See what ChatGPT keeps of your page

Dear {First name},

People used to search and click through ten links. Now they ask ChatGPT or Google and get one answer with a few names in it. If you're not one of those names, you don't get the visit, and you don't find out.

FoundByChat asks your customers' questions every day, in your market, and shows you the answers: who got named, which sources the AI read, and where you were left out. It covers ChatGPT, Google AI Mode, and Google AI Overviews, in the US and the Netherlands.

A good first step is our free page audit. It shows you what ChatGPT keeps of your page.

You can run it at foundbychat.com. FoundByChat is free to start, and if you have questions, write to support@bitgate.dev.

Kind regards,

Your Name

Role, FoundByChat
